

BLACKVUE
Your Reliable Eyewitness

Peace of mind for parking mode

POWER MAGIC PRO

Battery Draining Prevention Device

- *Hassle free Power switch to enable or disable Parking Mode*
- *Even with Parking Mode disable, power to BlackVue automatically turns On when driving (starts the ignition)*
- *Flexible settings for low voltage cut-off and timer*
- *Neat design for easy installation*
- *Extreme low power consumption*
- *Well made in Korea*

Power Magic PRO Battery Draining Prevent Device

Power Magic PRO is designed specifically for Black Vue, it is a battery draining prevention device. To have hassle free surveillance application by Black Vue, we recommend Power Magic PRO to be added on.

It will automatically cut off the power to Black Vue when voltage drops below the threshold voltage setting. Moreover, it also acts as a countdown timer where user can set the preferable duration to have the Black Vue operates when parked.

Power Magic PRO helps to prevent further draining of battery voltage when vehicle is parked for longer period of time.

The design allows the unit to be installed neatly , normally below the dashboard and without exposing any of the cable. The switch allows you to enable or disable the recording while your car is parked. Eventhough the switch is OFF, BlackVue will automatically switch ON when you start the engine.

SPECIFICATIONS:

- preventing car battery drain
- power controller for Black Vue
- 12V and 24V Application
- Low Voltage cut-off mode : 11.4V/11.8V(12V) or 22.4V/22.8V(24V)
- Timer setting : 6 ~ 12ohrs or infinity (switch off timer)
- ON/OFF switch (ON - supply power to Black Vue always/ OFF - supply power to Black Vue only during driving)
